

SAMUEL ANIEKEME JACOB

mercysam299@gmail.com | [Blog](#) | [GitHub](#) | [LinkedIn](#)

Cloud DevOps Engineer with 4+ years of experience designing, deploying, and managing scalable AWS cloud infrastructure. Expert in Kubernetes orchestration, serverless architectures (AWS Lambda), and building robust CI/CD pipelines using Jenkins and modern DevOps tools. Proven track record in automating processes, implementing security best practices (IAM, VPC design), and ensuring high availability across containerized and serverless workloads. Strong leadership and collaboration skills with experience mentoring teams and driving DevOps best practices adoption.

TECHNICAL SKILLS

Cloud Platforms: AWS, Google Cloud (GCP), Azure

Containers & Orchestration: Docker, Kubernetes (GKE & EKS)

Infrastructure as Code: Terraform, CloudFormation, Ansible

CI/CD: GitLab CI/CD, GitHub Actions, Azure DevOps, ArgoCD, CodePipeline

Monitoring & Observability: Prometheus, Grafana, Cloud Monitoring, Cloud Logging, CloudWatch

Scripting & Programming: Python, Bash

Databases & SQL: PostgreSQL, MySQL, DynamoDB, MongoDB

Networking: VPC, Load Balancers, DNS, Ingress, Service Mesh fundamentals

Tools: GitHub, GitLab, Bitbucket, Nginx, cPanel

OS: Linux, Windows

HANDS-ON PROJECTS

1. Production-Ready Kubernetes Deployment on AWS EKS

Tools: Amazon EKS, Docker, Jenkins, ArgoCD, Prometheus, Grafana, Terraform

- Deployed highly available microservices architecture on Amazon EKS across multiple availability zones
- Built comprehensive Jenkins CI/CD pipelines with automated testing, security scanning, Docker image builds, and GitOps deployments via ArgoCD
- Implemented cluster auto-scaling, pod horizontal scaling, and resource optimization strategies
- Set up Prometheus and Grafana monitoring with custom dashboards, alerts, and log analysis.
- Automated infrastructure provisioning using Terraform modules for reproducible EKS cluster deployments.

2. Static Website Deployment with AWS S3 and CloudFront

Tools: AWS S3, IAM, CloudFront

- Deployed a secure and optimized static website.
- Integrated CloudFront for enhanced content delivery and improved global performance.

3. Containerized Web Application Deployment on GCP Compute Engine

Tools: GCP VM Instances, Docker, VPC, Firewall, Python Scripting

- Containerized services and deployed them on GCP Compute Engine with secure VPC networking.
- Wrote Python scripts to automate environment setup and configuration updates.

4. CI/CD Pipeline for Multi-Environment Deployments

Tools: GitLab CI/CD, Docker, Kubernetes, ArgoCD, Terraform

- Designed multi-stage pipelines for dev, staging, and production deployments.
- Implemented automated Terraform provisioning and post-deployment health checks.
- Reduced manual deployment errors by 50%.

CERTIFICATIONS & EDUCATION

- Nanodegree in Cloud DevOps Engineering – Udacity
- AWS Cloud Practitioner (AWS CLF CO2) – Amazon Web Services
- DevOps and Site Reliability Engineering - The Linux Foundation
- Kubernetes and Cloud Native Associate (KCNA) - Cloud Native Computing Foundation

PROFESSIONAL EXPERIENCE

Varscon | DevOps Engineer December 2024 – September 2025

- Managed and optimized cloud infrastructure on GCP and AWS, focusing on uptime, scalability, and performance.
- Automated infrastructure as code (IaC) with Terraform, enabling seamless provisioning, versioning, and management of cloud resources.
- Optimized containerized deployments using Docker, AWS ECS, and Kubernetes (EKS), reducing application boot times and increasing resource efficiency.
- Managed AWS Secrets Manager for secure, centralized storage of application credentials, enhancing security and compliance.

Mbag Microfinance Bank | DevOps Engineer August 2024 - December 2024

- Managed domain configurations and DNS settings in cPanel, streamlining website hosting and email management.
- Implemented monitoring using Prometheus and Grafana, achieving 99.9% uptime for critical services.
- Implemented SSL/TLS security for Nginx with Let's Encrypt and Certbot, ensuring encrypted communications and compliance with security standards.

Volomn, Nigeria | DevOps Intern November 2023 - April 2024

- Automated repetitive tasks with Bash scripts and cron jobs.
- Provisioned and managed development, staging, and production environments.
- Supported monitoring setup and log analysis for debugging.
